

DCX Systems

DCX Systems Limited is a Bengaluru-based Indian defence manufacturing company providing end-to-end system integration and cable & wire harness assemblies, along with electronic manufacturing services (EMS/PCB assembly) through its wholly owned subsidiary Raneal Advanced Systems. Incorporated in 2011, the company holds AS-9100:2016 and ISO 9001:2015 certifications, a Defence Industrial License, and 4-Star Export House recognition, and listed on the BSE and NSE in November 2022 via an IPO. As of 10 July 2026 it had a market capitalization of approximately Rs2,230 crore.

Value Chain Positioning

DCX operates as a Build-to-Print system integrator and Indian Offset Partner (IOP), sitting between global defence OEMs (principally Israel Aerospace Industries/ELTA Systems, Lockheed Martin, Ametek, and Collins Aerospace) and the Indian and international defence programmes those OEMs ultimately serve. Upstream, customers themselves supply much of the technology, test equipment, and assembly instructions under an asset-light, offset/non-offset model — "they will give advance money, they will give you test equipment, they will give you technology, they will give assembly instruction," per Chairman Dr. H.S. Raghavendra Rao — while DCX buys components globally, assembles cables/wire harnesses and PCBs, and performs system integration and testing. Downstream, DCX supplies directly to these OEMs and, increasingly, to Indian defence entities (Hindustan Aeronautics Limited, Larsen & Toubro) for end use by the Indian Air Force, Navy, and Army, as well as export markets via its offset relationships. Backward integration into EMS/PCB assembly through Raneal reduces dependence on external component sourcing for its own cable and system-integration business.

Near Term (Next 1 to 2 Quarters)

- Order book grew, but revenue conversion has been delayed** [De layed]: Consolidated order book stood at Rs2,984 crore as of 31 March 2026 (up from Rs2,582 crore as of 31 December 2025), yet FY26 consolidated revenue fell 31.4% YoY to Rs743.34 crore. Chairman Dr. H.S. Raghavendra Rao attributed this to regulatory and supply-side factors rather than demand: "A certain of programmes experienced further slippages due to stringent technical qualification and certification processes inherent to defence-sector compliance." This supersedes the

"around 2 years maximum" execution timeline guided for the then-Rs2,855 crore order book at the Q4 FY25 concall (May 2025). (Q4 FY26 press release, 27 May 2026)

- **Management guides to a near-term momentum recovery** [Pending]: Following a year of double-digit revenue and margin declines, management pointed to easing bottlenecks: "Supply-chain stability is gradually being restored, export-license processes are progressing more predictably, and key programmes are successfully moving through their qualification milestones. With these positive developments, we anticipate stronger momentum in the upcoming periods." No Q1 FY27 results are out yet to confirm this. (Q4 FY26 press release, 27 May 2026)
- **New large order wins to convert into revenue, HAL order carries a 12-18 month execution window** [Pending]: DCX received purchase orders worth over Rs720 crore in Q4 FY26, including a Rs68+ crore Hindustan Aeronautics Limited (HAL) order for antennas and power supplies, and a Rs563+ crore order from an Indian entity for a Maritime Patrol Radar System. Management said these orders "pave way for a continuous and improved position in converting the healthy pipeline of opportunities into orders," with execution still ahead. On the HAL order specifically — DCX's first direct entry into a major DPSU — the Chairman said: "we need to execute this program within 12 to 18 months. This is the lead time has been put on the PO... we are confident to deliver this product." (Q4 FY26 press release, 27 May 2026; NDTV Profit KYC management interview, 11 Mar 2026)

Medium Term (6 to 12 Months)

- **ELTX radar/EW joint venture launch delayed to 2027** [Delayed]: At the Q4 FY25 concall (May 2025), the Chairman targeted operationalizing the ELTX Systems joint venture with ELTA Systems (Israel) within 11 months (implying ~April 2026): "We signed the JV and within 11 months we target to start the operation in this company." By the Q3 FY26 press release (February 2026) this had slipped: "we expect to complete the infrastructure and commence operation by 2027." The Q4 FY26 press release (May 2026) confirmed ELTX had broken ground at the Shoolagiri Industrial Area, Tamil Nadu, and reaffirmed the 2027 commercial-operations target — a multi-quarter delay from the original plan, now holding steady at the revised date.
- **NIART railway safety system nearing RDSO certification** [On Track]: At the Q4 FY25 concall, one final fog test remained pending for NIART's obstacle-detection system. By the Q3 FY26 press release (February 2026), NIART had "successfully completed its functional and fog test trials," with management stating it expects "to conclude on all the operational aspects of the system with the RDSO in the very near term and gear up to receive and deliver production batch orders."
- **Continued shift toward non-offset, export-weighted order mix** [Pending]: The order book is currently about 40-45% domestic and 55% export; at the FY25 AGM (October 2025), the Chairman indicated this mix should hold for several years but could tilt further toward exports: "may be this ratio will be continued next 3-4 years... We may be 60:40 in upcoming days." The non-offset share of system-integration projects has already risen from ~15% to ~40% historically, per the FY25 Annual Report MD&A.
- **New cable & PCB capacity expansion, ~USD1.5-2 million for FY26-27** [Pending]: Distinct from the ELTX JV capex, the Chairman guided to a dedicated capacity expansion for DCX's own cable and PCB business: "we are planning to put about a 1 and a half million to 2 million expansion plan especially on the cable and PCB site... we are budgeting about a \$2 million to invest on this 26-27," citing the need for "more spaces, more manpower, more equipment." (~Rs13-17cr at prevailing exchange rates.) (NDTV Profit KYC management interview, 11 Mar 2026)

Long Term (1+ Years)

- **Railway obstacle-detection TAM: 5,000-6,000 locomotives over 5 years** [Pending]: Of roughly 15,000 locomotives in India, management expects 5,000-6,000 to be fitted with NIART's obstacle-detection product over the next five years, plus visibility for about 1,750 units in one export market over three years: "in next 5 years about 5000-6000 locos to be deployed our product... other country, we have a total visibility in the next 3 years, about 1750 units per other country." (Q4 FY25 concall, May 2025)
- **Offset opportunity sized at ~USD1 billion against a USD13.21 billion pending industry obligation** [Pending]: DCX is targeting roughly USD1 billion of the estimated USD13.21 billion Total Offset Obligation still pending with

foreign OEMs per the Defence Offset Management Wing (DOMW), as part of its strategy to grow non-offset order share while still capturing offset-driven work. (Investor Presentation, Q3 & Q4 FY26)

- **Transition from build-to-print integrator to product company** [Pending]: Management's stated multi-year goal is to move from a build-to-print EMS/system-integration model toward a "technology-driven product company," using Transfer-of-Technology (ToT) deals from Israeli and US OEMs and the NIART/ELTX joint ventures as initial product vehicles, aimed at improving margins over time. (AGM, October 2025; FY25 Annual Report MD&A)

Marquee & Niche Customers

- **Israel Aerospace Industries (IAI) / ELTA Systems:** DCX is described as the "preferred & largest Indian Partner to Israeli Defence Company, IAI," with a relationship built over more than a decade, an ELTA order worth Rs483 crore for Close-In Weapon System module assemblies (FY25), and two active joint ventures (NIART, ELTX). (Investor Presentation, Q4 FY26; FY25 Annual Report)
- **Lockheed Martin Global Inc, USA:** A marquee export customer added in FY24; DCX and Raneal delivered a combined ~USD103 million (~Rs850 crore) of business with, per the Chairman, zero product rejections to date and a formal appreciation letter for quality and coordination. (AGM, October 2025)
- **Larsen & Toubro Limited (India):** A Rs1,250 crore purchase order, in early-stage delivery as of the FY25 AGM, requiring extensive component licensing (7,000-8,000 semiconductor components) and an on-the-job-training programme with the OEM team embedded at DCX/Raneal for over two months.
- **Hindustan Aeronautics Limited (HAL):** A domestic niche customer — a Rs68+ crore Q4 FY26 order for antennas and power supplies for airborne applications, signalling growing direct domestic-defence-entity business alongside the OEM-led offset model.
- **Collins Aerospace-India and Ametek Inc.:** Named as customers added since FY24 alongside Lockheed Martin and L&T, though no separate order-value or scale disclosure was found for either in the sources reviewed.

No top-10 or single-customer revenue-concentration percentage was disclosed in the sources reviewed for DCX; the closest disclosed concentration metric is the order book's domestic/export split (~40-45%/55% as of the FY25 AGM).

Customer's own guidance, independently checked: Lockheed Martin has itself publicly signalled a deepening India footprint — considering a first-ever C-130J Super Hercules final-assembly line outside the US, with 96% of C-130J wings now made in India and engagement with 500+ India-based suppliers — independent, third-party corroboration of continued demand from this named customer. No independently disclosed capacity or demand guidance specific to DCX was found from IAI/ELTA, L&T, Ametek, Collins Aerospace, or HAL in the sources reviewed.

Capex, Milestones & Certifications Timeline

Date/Horizon	Milestone	Status	Amount	Source
2015	Manufacturing facility commissioned at Hi-Tech Defence & Aerospace Park SEZ, Bengaluru	Achieved	—	Company timeline (Investor Presentation)
2018	AS-9100:2016 & ISO 9001:2015 certification (DQS Inc.); authorization to export Munitions List items to IAI/ELTA	Achieved	—	Company timeline
Nov 2022	IPO on BSE/NSE	Achieved	Rs400cr raised	Company timeline
2022-23	Raneal Advanced Systems incorporated (backward integration into EMS); NIART Systems Ltd. incorporated for railway obstacle detection	Achieved	—	Company timeline

Date/Horizon	Milestone	Status	Amount	Source
19 Jan 2024	Qualified Institutional Placement	Achieved	Rs500cr raised (Rs361.78cr of proceeds still pending utilization as of Mar 2025)	FY25 Annual Report, Note 45A
FY25	JV agreement signed with ELTA Systems (radar/EW systems) — ELTX Systems Pvt Ltd formed	Achieved	—	FY25 Annual Report MD&A
FY25 (date not further specified)	6,070 sq.m. land lease signed, Aerospace SEZ Sector, Bengaluru	Achieved	—	Investor Presentation, FY25 Annual Report
FY25/26	New Domestic Tariff Area (DTA) unit established with Raneal; commercial production "expected to commence shortly" (as of FY25 AR)	On-track/planned	Not separately disclosed	FY25 Annual Report MD&A
Q3 FY26 (Feb 2026)	Government Order from Government of Tamil Nadu granting incentive scheme for ELTX's Tamil Nadu facility	Achieved	—	Investor Presentation Q3 FY26
Q4 FY26 (May 2026)	Raneal expands with Oversized PCB Assembly Facility	Achieved	Not separately disclosed	Investor Presentation Q4 FY26
Q4 FY26 (May 2026)	ELTX Systems breaks ground at Shoolagiri Industrial Area, Tamil Nadu	Achieved	Not separately disclosed (CAPEX still under negotiation with equipment suppliers as of May 2025 concall)	Investor Presentation Q4 FY26
By 2027	ELTX facility completion and commercial operations start	Planned (delayed from an original ~11-month/April 2026 target)	Not disclosed	Q3/Q4 FY26 press releases

Financial Performance Summary

Consolidated, last 5 fiscal years (screener.in):

FY	Revenue (INR cr)	YoY Growth	Op. Profit Margin (OPM)*	PBT (INR cr)	PAT (INR cr)	PAT Margin
FY22	1,102	+71.9%	6.1%	76	66	6.0%
FY23	1,254	+13.8%	6.7%	86	72	5.7%
FY24	1,424	+13.6%	5.6%	95	76	5.3%
FY25	1,084	-23.9%	0.5%	60	39	3.6%
FY26	743	-31.4%	-2.3%	9	(8)	-1.1%

*screener.in discloses Operating Profit Margin (OPM), not a separate gross-margin line — shown here as OPM, not gross margin. FY26's consolidated numbers were further weighed down by a Rs41.78cr loss at wholly owned subsidiary NIART Systems (an R&D-stage entity yet to commence commercial production), of which Rs16.27cr was a non-cash foreign-currency-translation loss. (Q4 FY26 press release)

Segment-wise Performance

DCX Systems is "exclusively engaged in the business of manufacturing of electronic sub-systems and cable harness for both international and domestic aerospace and defence sector," which under Ind AS 108 "are considered to constitute one single primary segment." No segment-wise revenue table is presented in the annual report; this is a single-segment business. (FY25 Annual Report, Note 42, Operating Segment)

Order Book

As-of Date	Order Book (INR cr)	Basis	Composition	Source
31 March 2026	~2,984	Consolidated	Domestic/export split not re-disclosed at this date; as of the Oct 2025 AGM, order book was ~40-45% domestic / ~55% export	Q4 FY26 press release, 27 May 2026

The order book has moved from Rs2,855 crore (31 March 2025) to Rs2,582 crore (31 December 2025) and back up to Rs2,984 crore (31 March 2026) — a net increase over the year despite an intra-year dip. A same-period order **inflow** figure was also disclosed: DCX received new purchase orders of more than Rs720 crore in Q4 FY26 alone (including the HAL and Maritime Patrol Radar System orders discussed above), a flow figure distinct from the cumulative order-book level shown in the table.

Manufacturing Locations & Physical Assets

Location	Owned/Leased	Area	What it houses	Source
Plot Nos. 29, 30 & 107, Hi-Tech Defence & Aerospace Park SEZ, Dev anahalli/Kavadadasanahalli, Bengaluru Rural, Karnataka	Leasehold (6,070 sq.m. land lease, Aerospace SEZ Sector)	~30,000 sq. ft. unit	Core cable & wire harness manufacturing and system integration; DCX's registered office	FY25 Annual Report; Investor Presentation
Same industrial park, Bengaluru (Raneal Advanced Systems, wholly owned subsidiary)	Not separately disclosed	~40,000 sq. ft. EMS facility	Electronics Manufacturing Services / PCB assembly, including a newly added Oversized PCB Assembly Facility (Q4 FY26). Per the Chairman, standard Indian PCB manufacturing tops out at ~24 inches in length; the new facility extends this to ~56 inches, using custom-built equipment engineered jointly with a foreign machine OEM. The investment was underwritten by a ~Rs20 crore order (with advance received) from a US customer relationship, committed before the facility was even ready: "just to our relationship as given a 20 cr worth of order without having any facility ready. We have a PO on hand. Based on that PO we received an advance."	Investor Presentation, Q4 FY26; NDTV Profit KYC management interview, 11 Mar 2026
New Domestic Tariff Area (DTA) unit, with Raneal	Not disclosed	Not disclosed	Additional manufacturing capacity; commercial production expected to commence shortly as of the FY25 Annual Report	FY25 Annual Report MD&A

Location	Owned/Leased	Area	What it houses	Source
Shoolagiri Industrial Area / Hosur, Tamil Nadu (ELTX Systems, joint venture with ELTA Systems)	Under a Government of Tamil Nadu incentive scheme; construction/grou ndbreaking stage	Not disclosed	Planned defence manufacturing facility for radar and EW systems; commercial operations targeted by 2027	Investor Presentation, Q4 FY26; AGM transcript

No overseas manufacturing sites were disclosed for DCX itself; its subsidiary NIART Systems Ltd. is incorporated in Israel but is described as an R&D-stage entity rather than a manufacturing site.

Capacity Utilization & Headroom

No capacity utilization percentage, nor the installed-capacity/units-produced inputs needed to derive one, was disclosed in any of the sources reviewed (concalls, investor presentations, or the FY25 Annual Report). This section is included per the framework's requirement to check for utilization data, and states explicitly that none was found rather than estimating one.

Total Addressable Market (TAM)

Management discloses TAM by product line, sourced from an F&S (Frost & Sullivan) industry report cited consistently across the FY25 Annual Report and the Q3/Q4 FY26 investor presentations:

- **Cable & Wire Harness industry:** USD541.2 million (2022) growing to USD1,477.3 million by 2029, a 15.4% CAGR.
- **EMS (Electronics Manufacturing Services) industry:** USD400.0 million (2019) growing to USD4,510.0 million by 2025, a 49.7% CAGR. Note: this figure's stated capture-horizon year (2025) has now passed as of this report's date (July 2026) without a refreshed 2025-actual or updated forward figure appearing in the Q4 FY26 deck — treat it as dated.
- **MRO industry:** USD77.0 million (2022) growing to USD165.0 million by 2031, an 8.8% CAGR.
- **Offset opportunity:** A separately disclosed total pending Defence Offset Management Wing (DOMW) obligation of ~USD13.21 billion owed by foreign OEMs, of which DCX is targeting an opportunity size of ~USD1 billion (see Long Term outlook above — this is the same item, not duplicated here).

Valuation — Forward PE

No explicit forward revenue guidance was found for DCX Systems in any source reviewed. Management has repeatedly and explicitly declined to give revenue guidance — at the Q4 FY25 concall, when asked for FY26 revenue guidance, the Chairman replied: "Sorry sir, I won't be able to. Normally, until we sign it off, we will not be able to provide and that is not my practice." Per the framework, Forward PE requires management's own guided revenue figure as an input; since none exists, this section is omitted rather than substituting an unguided estimate.

Industry Tailwinds / Headwinds

Tailwinds

- **Record defence budget and capex push:** India's FY26-27 defence budget reached an all-time high of ~USD88 billion, up 15.2% YoY, with capital expenditure allocation up 21.8% and R&D spending up 8.5%. (Government of India budget disclosures, as reported)
- **Sector-wide double-digit growth guided by rating agencies:** ICRA guided the Indian defence sector to 15-17% revenue growth in FY26, with weighted-average operating margins expected at 25-27% — notably well above DCX's own FY26 consolidated operating margin. (ICRA press release, 18 June 2026)

- **Record defence exports and rising private-sector share:** India's defence exports reached a record Rs38,424 crore in FY26, with the private sector's contribution to defence production climbing to 24% (from 22% in FY25) — a structural tailwind for a private, non-DPSU player like DCX. (Government/press reporting, April-June 2026)
- **Key customer's own India expansion:** Lockheed Martin is considering India's first C-130J final-assembly line outside the US and now sources 96% of C-130J wings domestically, independent evidence of continuing OEM investment in the Indian defence-manufacturing base DCX supplies into. (Indian Defence News, February 2026)

Headwinds

- **Sector-wide execution bottleneck, not a DCX-specific problem:** Sector commentary describes India's defence sector as "order book-loaded" and now needing an "execution pick-up" — delivery and manufacturing throughput risk rather than order-intake risk — consistent with DCX's own admission of certification- and export-license-driven revenue-realization delays in FY26. (Business Standard, 8 July 2026)
- **Export-license and component supply-chain delays across the industry:** DCX's own management cited suppliers of critical components facing "substantial delays in securing export licenses from their respective authorities" and geopolitically driven supply-chain disruption during FY26 — a pattern also affecting the wider defence-electronics import/export-control chain, not unique to one supplier. (Q4 FY26 press release)

Technical Snapshot

(As of 10 July 2026 — treat as directional only and refresh before relying on it.)

- Price: Rs200.17, trading above both the 50-day SMA (Rs198.8) and 200-day SMA (Rs195.4).
- RSI (14-day): 52.1 — neutral, neither overbought nor oversold; Money Flow Index at 80.9 is flagged as "strongly overbought" by the same source.
- 52-week range: Rs153.30 - Rs286.00; the stock was noted as trading roughly 30% below its 52-week high, with "very high volatility."
- Near-term pivot levels: resistance at Rs200.53/201.45/202.11 (R1/R2/R3), support at Rs198.95/198.29/197.37 (S1/S2/S3) — tight, intraday pivot bands rather than swing-level support/resistance.

Promoter / Governance Track Record

Guidance reliability: DCX management has not given explicit numeric revenue or margin guidance to check against actuals (see Valuation section above) — the trackable items over the last two quarters are qualitative milestones. Of the two tracked in this report: the ELTX joint-venture launch has been **delayed** (from an original ~11-month/April 2026 target at the Q4 FY25 concall to "by 2027" as of the Q3 and Q4 FY26 press releases), while the NIART railway-safety certification is **on track** (fog-test trials completed between the Q4 FY25 concall and the Q3 FY26 press release, against the single outstanding test flagged in May 2025).

Promoter shareholding trend: Promoter holding has declined from 71.72% (March 2023) to 62.30% (March 2024), 56.86% (March 2025), and 52.17% (March 2026). This is mechanically explained by two company-level equity raises — the November 2022 IPO and a January 2024 Qualified Institutional Placement (see Promoter Fund Raises below) — rather than any preferential allotment or promoter-specific dilutive action. No pledge of promoter shares was disclosed in the sources reviewed.

Auditor/compliance: The FY25 standalone and consolidated financial statements carried an unmodified audit opinion from statutory auditors NBS & Co.; no auditor qualification or delayed filing was found in the sources reviewed.

Promoter Fund Raises: One company-level fund raise is on record — a Rs500 crore Qualified Institutional Placement on 19 January 2024, allotted to institutional investors (not promoter/promoter-group), with Rs361.78 crore of proceeds still pending utilization as of March 2025 (FY25 Annual Report, Note 45A). No preferential equity, warrants, NCDs/debentures, term loans, or promoter loans/guarantees were found on record for DCX Systems in the sources reviewed.

Credit Rating Snapshot:

Agency	Instrument	Rating	Outlook	Date	Action
CRISIL	Bank facilities (fund & non-fund based)	A-/A2+	Stable	31 Jan 2025	Reaffirmed
CRISIL	Bank facilities, Rs1,000cr (fund & non-fund based)	BBB+/A2	Stable	8 May 2026	Downgraded from A-/Stable and A2+

This is a rating downgrade currently in force — CRISIL lowered DCX's long-term rating from A-/Stable to BBB+/Stable and its short-term rating from A2+ to A2 on 8 May 2026, following the same FY26 revenue decline (-31.4% YoY) and sharp EBIT/PAT deterioration discussed above. No ICRA, CARE, India Ratings, Acuite, or Brickwork rating was found for DCX Systems in the sources reviewed.

Legal & Litigation: Five tax-related matters are on record, all currently ongoing (none dismissed or closed):

Case	Forum	Type	Amount (INR cr)	Status
Income tax dispute, AY2020-21	Commissioner of Income Tax (Appeals)	Tax dispute	0.49	Ongoing
Transfer pricing dispute, AY2021-22 (Sec 92D(3)/92CA)	Dispute Resolution Panel (DRP)	Tax dispute	11.59	Ongoing
GST dispute, AY2019-20	CBIC, Bengaluru	Tax dispute	0.21	Ongoing
GST dispute, Jul 2017-Mar 2020	CBIC, Bengaluru	Tax dispute	1.22	Ongoing
GST demand, FY23 (excess ITC claim)	Commercial Taxes Department, Government of Karnataka	Tax dispute	1.46	Ongoing

The first four are disclosed in the FY25 Annual Report's contingent-liabilities note; the fifth is a fresh demand (tax Rs0.80cr, interest Rs0.58cr, penalty Rs0.08cr) disclosed via BSE announcement on 17 June 2026, which the company says has "no material impact" and plans to appeal. Aggregate disclosed contingent tax exposure across all five matters is approximately Rs14.97 crore — modest relative to the company's balance sheet, but a factual open item across income tax, transfer pricing, and GST forums.

Key Risks

- **Execution and certification risk, already realized:** FY26 consolidated revenue fell 31.4% YoY despite the order book growing to Rs2,984 crore, driven by export-license delays and "stringent technical qualification and certification processes inherent to defence-sector compliance" — a risk that has already materialized once and, per management's own framing, is only now easing.
- **Credit rating downgrade:** CRISIL downgraded DCX's bank-facility ratings to BBB+/Stable (from A-/Stable) and A2 (from A2+) on 8 May 2026, an independent, third-party confirmation of the same deterioration reflected in FY26 results.
- **ELTX joint-venture delay:** The ELTX Systems radar/EW joint venture with ELTA — a key vehicle for DCX's product-company ambitions — has slipped from an original ~11-month (April 2026) target to a "by 2027" commercial-operations date, a multi-quarter delay in a strategically important new business line.
- **Consolidated drag from NIART's R&D losses:** NIART Systems posted a Rs41.78 crore FY26 loss (including a Rs16.27 crore non-cash FX-translation loss) as a pre-commercial R&D entity, depressing consolidated profitability even where the standalone business showed sequential improvement.
- **Margin well below sector average:** DCX's FY26 consolidated operating margin of -2.3% (and PAT margin of -1.1%) sits far below ICRA's cited 25-27% weighted-average operating margin for the Indian defence sector in FY26 — reflecting both DCX's asset-light, pass-through-heavy build-to-print model and this year's reporting-period-specific slippages.
- **War-related logistics and export disruption, partially offset by higher Israeli demand:** Speaking mid-Q4 FY26, the Chairman flagged transportation risk from the Israel-Iran/Middle East conflict — "our shipments normally go on

the air and... it is not so easily transported" — while separately noting that Israeli customers were requesting expedited delivery given the situation there. Production itself had not been affected as of the interview ("majority of the material production is going on"), but continued conflict escalation remains a live risk to dispatch timelines. (NDTV Profit KYC management interview, 11 Mar 2026)

Source: DCX Systems Q4 FY25 (28 May 2025) and Q3/Q4 FY26 (12 Feb 2026 / 27 May 2026) earnings press releases and concall transcript, the 14th AGM transcript (October 2025), Q3 & Q4 FY26 investor presentations, the FY25 Annual Report (standalone financial statements, Notes 33/34/42/44/45A), CRISIL rating rationale/letters (31 Jan 2025, 8 May 2026), screener.in financial and shareholding data, BSE corporate announcements, a management interview on NDTV Profit's KYC show (11 Mar 2026), and third-party industry/technical coverage (ICRA press release, Lockheed Martin/Indian Defence News, Business Standard, Trendlyne, Investing.com) as cited inline. Updated 12 Jul 2026 with detail from the 11 Mar 2026 management interview: HAL order execution timeline, a new ~USD1.5-2 million cable/PCB capacity expansion for FY26-27, added detail on the Raneal oversized PCB facility (24in to 56in capability, tied to a ~Rs20cr US customer commitment), and a war-related logistics/export risk note. This is a research summary of publicly available management commentary and filings only — not investment advice, a recommendation, or a solicitation to buy, sell, or hold any security. Conduct independent due diligence and consult a SEBI registered investment advisor before making any financial decision.
