

OBSC Perfection Limited

OBSC Perfection Limited manufactures precision metal components, primarily supplying original equipment manufacturers (OEMs) and Tier 1 suppliers in the automotive sector, alongside a growing non-automotive business in defence, marine and telecommunication infrastructure. Incorporated in 2017 and converted to a public limited company on 12 July 2024, the company listed on the NSE SME Emerge platform on 29 October 2024 following an IPO that raised Rs. 66.02 crore. As of 10 July 2026 it had a market capitalization of approximately Rs. 1,720 crore (screener.in). The company is part of the Anglian Omega Group, whose promoter-group heritage traces back to a bright-bar factory in Faridabad, Haryana, founded in 1969 — a promoter-group historical fact distinct from OBSC Perfection's own current manufacturing footprint (see Manufacturing Locations below).

A sourcing note for this report: the primary Q4 FY26 (~21 May 2026) concall transcript could not be retrieved in this run — the company's investor-relations pages returned JS-rendered content that couldn't be extracted, the investor presentation PDF exceeded this tool's size limit, and NSE archive searches for the specific transcript filing did not surface a working link. Forward-looking figures in this report (FY27 capex, humanoid robotics contribution, AS9100D certification timeline) are therefore sourced to secondary financial-news coverage of that release rather than directly-quoted primary transcript text, and are flagged accordingly rather than presented as formally-quoted outlook bullets. This should be closed out on a future refresh once the primary transcript is available.

Value Chain Positioning

OBSC Perfection machines precision metal components from raw metal/bar stock inputs (specific suppliers not disclosed in the sources reviewed) and supplies both directly to OEMs and indirectly via Tier 1 suppliers. Named automotive customers/relationships include Ashok Leyland, Tata Motors, and Mahindra (the latter via Tier 1 supplier Tenneco), with Tata AutoComp cited as a fast-growing customer with Tesla-related automotive exposure. In the non-automotive business, the company supplies defence, marine and telecommunications infrastructure manufacturers, and is diversifying further into humanoid robotics (currently at the prototyping/validation stage with customers) and aerospace (pursuing AS9100D certification).

Near Term (Next 1 to 2 Quarters)

- **FY26 Revenue and Profit Delivered** [Delivered]: FY26 revenue from operations came in at Rs. 219.54cr (+53.8% YoY) and net profit at Rs. 27.01cr (+61.2% YoY) — completed full-year outcomes. (Source: company exchange disclosure, ~May 2026)
- **Order Received, Commencement Expected June 2026** [Pending]: The company disclosed receipt of an order (10 March 2026 filing) with expected commencement from June 2026; specific value and counterparty were not confirmed in the sources reviewed for this report. (Source: NSE disclosure, 10 Mar 2026 — title only; full content not independently verified in this run)

Medium Term (6 to 12 Months)

- **FY27 Capex Guidance** [Pending]: Management guided FY27 capital expenditure of approximately Rs. 15-20cr, expected to support growth over the subsequent two years. Sourced to secondary coverage of the Q4 FY26 investor release (primary transcript not retrieved in this run — see sourcing note above).
- **AS9100D Aerospace Certification In Progress** [Pending]: The company is pursuing AS9100D certification (the internationally-recognized aerospace manufacturing quality standard), described as an intense process expected to take approximately one year. Sourced to secondary coverage; primary transcript not retrieved in this run.

Long Term (1+ Years)

- **Humanoid Robotics Diversification** [Pending]: Management indicated the company has participated in humanoid robotics work from the prototyping and validation phases, and expects this business to make an important contribution in FY27. Sourced to secondary coverage; primary transcript not retrieved in this run.
- **Order Book Composition Provides Multi-Year Visibility** [Pending]: The order book stood at more than Rs. 1,200cr as of FY26 close, comprising approximately Rs. 980cr automotive and Rs. 230cr non-automotive (defence/marine/telecom) work — roughly 5.5x FY26 revenue, implying multi-year execution visibility if the mix holds. Sourced to secondary coverage; primary transcript not retrieved in this run.

Marquee & Niche Customers

- **Ashok Leyland**: Named automotive customer. (Source: secondary coverage of investor disclosures)
- **Tata Motors**: Named automotive customer. (Source: secondary coverage of investor disclosures)
- **Mahindra (via Tenneco)**: Indirect relationship through Tier 1 supplier Tenneco. (Source: secondary coverage of investor disclosures)
- **Tata AutoComp (niche)**: Described as a fast-growing customer with exposure to Tesla-related automotive operations. (Source: secondary coverage of investor disclosures)

No customer-concentration percentage was disclosed in the sources reviewed. **Customers' own guidance**: no independently disclosed capacity or demand guidance from Ashok Leyland, Tata Motors, Mahindra, Tenneco, or Tata AutoComp specifically corroborating demand for OBSC's products was found in the sources reviewed for this report.

Capex, Milestones & Certifications Timeline

Date/Quarter	Milestone	Status	Amount	Source
Ongoing (existing)	ISO 9001 and IATF 16949 (automotive quality standard) certifications	Achieved	—	Company website (secondary coverage)
~1 year from initiation, ongoing as of Q4 FY26	AS9100D (aerospace) certification in progress	In progress	—	Secondary coverage of Q4 FY26 investor release

Date/Quarter	Milestone	Status	Amount	Source
Disclosed 10 Mar 2026	New order received, expected commencement June 2026	Achieved (order received); commencement planned	Not confirmed in sources reviewed	NSE disclosure, 10 Mar 2026
FY27	Planned capex for growth	Planned	Rs. 15-20cr	Secondary coverage of Q4 FY26 investor release

Financial Performance Summary

Fiscal Year	Revenue (Rs. cr)	YoY Growth	EBITDA Margin	PBT (Rs. cr)	PAT (Rs. cr)	PAT Margin
FY22	56	—	13%	4	4	7.1%
FY23	95	+69.6%	10%	6	5	5.3%
FY24	115	+21.1%	18%	16	12	10.4%
FY25	142	+23.5%	18%	21	17	12.0%
FY26	220	+54.9%	18%	32	27	12.3%

Source: screener.in. Note FY26's screener-reported revenue of Rs. 220cr and the company's own exchange disclosure of Rs. 219.54cr are consistent (rounding); PAT of Rs. 27cr (screener) matches the disclosed Rs. 27.01cr precisely. Revenue growth has accelerated sharply since listing (Oct 2024), with EBITDA margin stabilizing around 18% since FY24 after a dip in FY23.

Segment-wise Performance

No formal historical revenue-by-segment (automotive vs. non-automotive) breakdown was found in the sources reviewed. The closest available figure is the **order book's composition, not a historical revenue split**: as of FY26 close, the order book was approximately 82% automotive (Rs. 980cr) and 19% non-automotive/defence-marine-telecom (Rs. 230cr) of the >Rs. 1,200cr total — already captured in the Long Term outlook above rather than duplicated as a table here.

Order Book

As-of Date	Order Book (Rs. cr)	Basis	Composition	Source
FY26 close (~Mar 2026)	>1,200	Total	Automotive ~Rs. 980cr (~82%); Non-automotive (defence/marine/telecom) ~Rs. 230cr (~19%)	Secondary coverage of Q4 FY26 investor release

No separate order-**inflow** figure (new orders booked in a specific period, distinct from the cumulative order-book level) was disclosed in the sources reviewed.

Manufacturing Locations & Physical Assets

Location	Unit
Pune, Maharashtra	Units I, II and IV
Chennai, Tamil Nadu	Unit III

Source: secondary coverage citing company disclosures. Owned-vs-leased status and built-up area were not disclosed in the sources reviewed. Note: the promoter group's (Anglian Omega Group) own corporate history references an original 1969 bright-bar factory in Faridabad, Haryana — this is promoter-group heritage context, not

one of OBSC Perfection Limited's own four current manufacturing units listed above.

Capacity Utilization & Headroom

No capacity utilization percentage or installed-capacity/units-produced figures were disclosed in the sources reviewed for this report.

Total Addressable Market (TAM)

No specific TAM figure (a market-size number) was disclosed in the sources reviewed for this report.

Valuation — Forward PE

Not included. No explicit forward revenue or margin guidance for FY27 was found in the sources reviewed — only a capex figure (Rs. 15-20cr) and qualitative growth-driver commentary (humanoid robotics, AS9100D-enabled aerospace work). Consistent with this report's own methodology, a forward PE is only computed when the company has given an explicit forward revenue guidance figure for a defined period; that bar was not met here, so the section is omitted rather than built on an unsupported proxy.

Industry Tailwinds / Headwinds

Tailwinds

- **Automotive OEM/Tier-1 demand growth:** reflected in the ~82% automotive share of the order book and the FY26 revenue acceleration (+53.8% YoY).
- **Defence/marine/telecom infrastructure diversification:** a structurally different, less-cyclical demand base than pure automotive component supply, already ~19% of the order book.
- **Emerging humanoid robotics and aerospace verticals:** both cited by management as future growth avenues, though pre-revenue-scale as of this report (prototyping/validation stage for robotics; certification still in progress for aerospace) — genuine option value, not yet a proven revenue driver.

Headwinds

- **SME-platform listing:** OBSC Perfection trades on the NSE SME Emerge platform rather than the mainboard, which typically carries different liquidity, disclosure-cadence and institutional-ownership characteristics than mainboard-listed peers covered elsewhere in this report series — a structural factor for readers to weigh, not a company-specific operating risk.
- **Concentration in automotive component supply:** despite diversification efforts, ~82% of the current order book remains automotive-linked, exposing the company to the sector's inherent cyclicity.
- **New/unproven diversification bets:** both humanoid robotics and aerospace (AS9100D-gated) revenue contributions are still ahead of the company, not yet delivered — execution risk on both fronts.

Technical Snapshot

(As of approximately 8-10 July 2026 — this section goes stale within days; re-check before relying on it if this report is more than a week old.)

- Current price: Rs. 662.50-Rs. 666 (screener.in / secondary technicals source, 10 Jul 2026), close to its 52-week high of Rs. 673.85 (52-week low: Rs. 269.95).
- 14-day RSI: ~64 (approaching overbought territory, not yet extreme).
- 1-year return: approximately +89% (as of ~8 Jul 2026 sourcing).
- Moving averages and MACD readings were bullish across the timeframes reported by the technicals source used.

Promoter / Governance Track Record

Only one guidance-vs-actual-style item has enough history to assess so far (first research run for this company): FY26 revenue/profit delivery, both up sharply YoY — a completed, favorable outcome. There is not yet a multi-quarter track record to characterize a broader pattern, and this is also a relatively newly-listed company (October 2024 IPO), so the track record itself is inherently short.

Shareholding: Promoter shareholding stood at 69.81% as of March 2026 (screener.in), down from 73.49% in March 2025 — a one-year decline of about 3.7 percentage points. No share pledge was shown in the sources reviewed, and no explanation for the decline was found — stated without speculation on cause.

Promoter Fund Raises: No promoter/promoter-group preferential allotment, warrant issue, or promoter loan was found in the sources reviewed for this report, beyond the company's own October 2024 IPO (a public issue, not logged here as a promoter-specific fund raise).

Credit Rating Snapshot: CRISIL Ratings assigned a first-time rating of BBB+/Stable on 3 July 2026, covering approximately Rs. 100cr of bank facilities (Cash Credit Rs. 45.25cr, Term Loan Rs. 33.08cr, Proposed Fund-Based Limits Rs. 21.67cr). The rationale cites experienced promoters, a diversified product profile, a healthy order book, and a comfortable financial risk profile. No downgrade or negative/watch-negative outlook is in force — this is the company's only rating action on record, so no upgrade/downgrade trend can be shown yet.

Legal & Litigation: One matter is on record. An employee, Seema Vishwamber Rathod, filed a claim of Rs. 10.75 lakh (~Rs. 0.11cr) under Section 4 of the Employees' Compensation Act, 1923, following a workplace injury — immaterial in size relative to the company's scale, but logged per this report's discipline of checking litigation on every run. No contingent liabilities were otherwise disclosed as of FY2024 per the sources reviewed, and no other litigation, tax dispute, or regulatory/arbitration matter was found.

Key Risks

- **Primary-source sourcing gap this run:** several forward-looking figures in this report (FY27 capex, humanoid robotics contribution, AS9100D timeline) rely on secondary news coverage rather than a directly-retrieved primary transcript — readers should treat these with slightly more caution than the verbatim-quoted items elsewhere in this report series, and a refresh should prioritize closing this gap.
- **Automotive concentration:** ~82% of the order book remains automotive-linked despite diversification efforts, leaving the company exposed to sector cyclicity.
- **Execution risk on new verticals:** both the humanoid robotics and aerospace (AS9100D-gated) opportunities are pre-revenue or early-stage as of this report — genuine optionality, but unproven.
- **SME-platform characteristics:** NSE SME Emerge listings typically carry different disclosure cadence, liquidity, and institutional-ownership profiles than mainboard listings — a structural factor rather than an operating risk, but relevant context for comparability against mainboard peers in this report series.
- **Declining promoter holding:** down from 73.49% (Mar 2025) to 69.81% (Mar 2026), with no disclosed explanation found in the sources reviewed.
- **Elevated valuation with a short track record:** a PE of ~63.7x on a company listed less than two years, with only one full post-listing fiscal year (FY26) of results — leaves limited history to judge consistency of execution against a newly-set, largely secondary-sourced set of forward targets.

Research summary of publicly available information only — screener.in, CRISIL Ratings, the company's DRHP, and third-party news coverage as cited inline (primary Q4 FY26 concall transcript not retrieved in this run — see sourcing note). This is not investment advice; consult a SEBI-registered investment advisor before making any financial decision.
